23.4% 24.1%

of all COVID-19

Rural areas in South Carolina see higher rates of COVID-19 cases, hospitalizations, and deaths

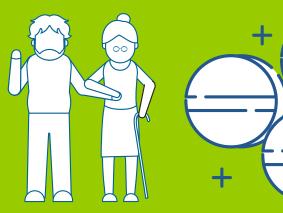

29.2%

COVID-19 in Rural South Carolina, by Race

White 39.7%

> **Blacks see higher** rates of COVID-19 in rural areas compared to urban areas (29.2% in rural *vs.* 18.7% in urban)

Individuals living in rural South Carolina who are diagnosed with COVID-19 are on average, older, with more comorbid conditions, and more likely to be hospitalized when compared to those in urban areas.

COVID-19 has disproportionately affected those living in rural areas. Individuals are seeing higher rates of cases, hospitalizations, and deaths.

It is important for individuals in rural areas to get vaccinated when it is their turn to do so.
